

# Steel Edge Doors Contain Extra Features...

## Polyurethane Insulation:

Doors are fully insulated with an inner core of environmentally friendly polyurethane foam. Provides energy efficiency and reduces noise.

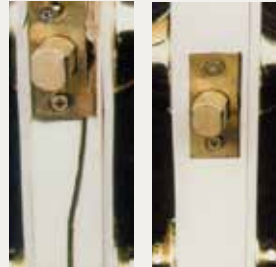

## Adjustable Hinge:

A standard on all 22 gauge steel edge doors. The unique adjustable hinge plate system offers built-in advantages unmatched in the industry. The adjustable hinge plate makes it possible to adjust the door up or down, in or out. Helps maintain door alignment and proper weather seal. **All that's needed is a screwdriver!**

## Composite Reinforced Lock Preparation:

Provides rigid base for installation of hardware. Reinforces lock block area for added security. Permits a more uniform foam fill for better insulation, unlike wood lock blocks.

## Steel Edge Construction:

A full steel edge adds greater strength and durability. There are no wood edges to rot, warp, split or bow. Steel edge doors maximize the security of your home. All steel edge doors have a 90-minute fire rating, meeting the requirements of ASTME—152.

## Low Maintenance PF Composite:

Poly-Fiber door frame is moisture, rot and insect resistant. Will never warp, splinter or rot like traditional wood. Optional finishes available.

## Door Light and Frame:

All tempered door lights, clear or decorative are warranted for a lifetime. The frame will not warp from high heat. The insulated tempered glass produces the best energy efficiency.

## Steel Security Plate:

Steel security plate reinforces the jamb and deadbolt area for added security. Helps prevent forced entry.

## Door Bottom Seal:

The door bottom sweep slides off for an easy replacement and forms a weather-tight seal to the threshold.
