NEW CONSTRUCTION APPLICATIONS**

SERIES 4700 PREMIUM PATIO DOOR

Maintenance-Free Elegance For the Way You Live Today

Our vinyl Patio Doors combine architectural styling with state-of-the-art energy efficiency. These versatile patio doors can be customized by adding colonial or diamond grids, a brass or satin nickel handle and/or interior kicklocks. Low-E/Argon Glass is standard and increases the door's energy efficiency by reducing heat transfer.

Easy-Glide Door with High-Quality Screen

Adjustable, all metal tandem rollers running on an aluminum track with stainless steel cap ensures that these beautiful patio doors open and close easily and smoothly over years of service. Heavy-duty aluminum screen panels with no-rust fiberglass mesh and adjustable rollers allow for easy screen movement.

Multi-Chambered Design Ensures Optimum Energy Efficiency

Our patio doors feature highly efficient, multi-chambered insulation to keep your home cooler in the summer and warmer in the winter. With fusion-welded frame and sash panels, energy efficient glass, internal glazing, and tight weather sealing, this state-of-the-art patio door delivers significant energy savings in any climate.

Custom Exterior Coatings*

We offer 12 standard exterior coatings, and will match any color—of your choice—with a 15 year warranty!

Custom Sizes

Target offers custom sizes for our vinyl patio door for projects that demand unique architectural sizing.

Style to Add Appeal

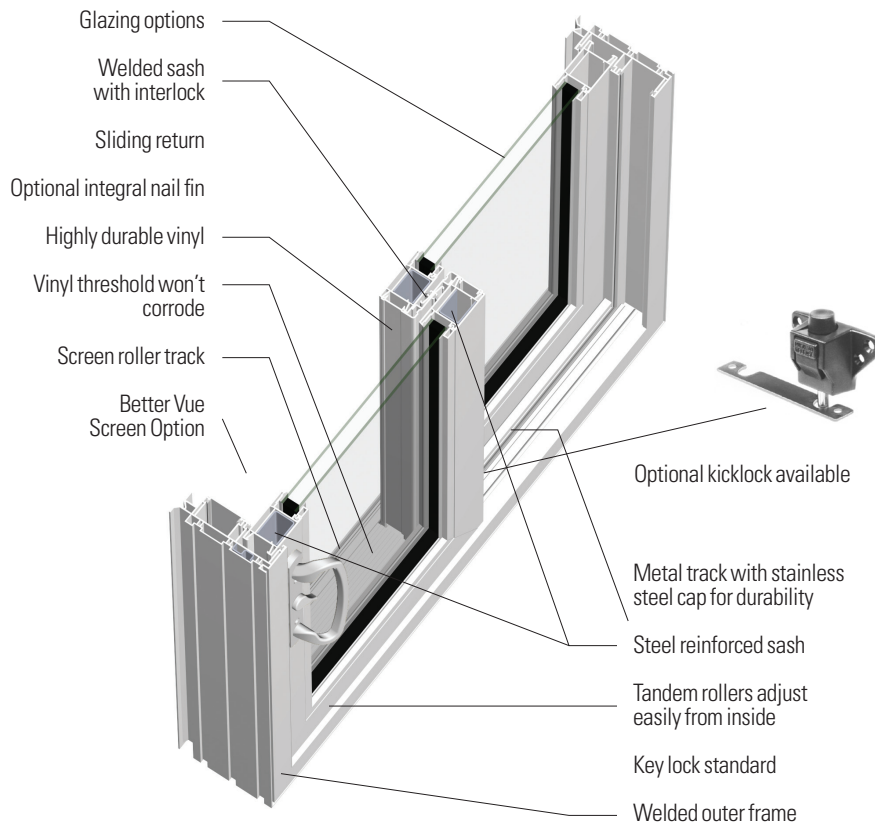

When you select our patio doors, you're choosing professionally designed doors made to complement the interior of any home. And they are available in the colors and finishes preferred by today's home-owners – white or beige.

Low Maintenance and Long Life

Our highly durable vinyl patio doors provide long lasting beauty and operation with almost no maintenance.

Warranty
